

OF+™ – Our Strongest Track Ever

OF+ is the next generation of our bestseller, OF – now upgraded to handle the largest forestry machines in the most demanding terrain. With a reinforced design and a new, more robust cross-sectional profile, OF+ is the strongest track we have ever made. Its angular profile also ensures stable grip, even after long-term wear. OF+ is engineered to deliver maximum durability, strength, and performance – exactly where it's needed the most.

- Sharper Slip bar – Provides perfect grip on the tire and excellent clearing of snow and mud.
- 19% more torsion-resistant – Offers greater stability than our previous strongest track.
- A full 117% stronger in fatigue tests – Compared to our EVO profile.
- Larger cleats – 50x30x50 mm instead of 50x30x35 mm for better grip.
- Three variants – OF+ is available as Narrow, Standard, and Soft.
- Compatible with all our link systems
- Recommendation – For maximum performance, combine with 29 mm or MAX link systems.
